The screenshot shows the GitHub profile for 'The Core C++ User Group'. The profile header includes the group's logo (a stylized 'C' with three leaves) and the name 'The Core C++ User Group'. Below the header, there are statistics for Repositories (1), People (1), Teams (0), and Projects (0), along with a Settings link. A search bar for repositories is present, with filters for 'Type: All' and 'Language: All'. The main content area displays a repository named 'raffle' with the description: 'Fetches the names of all RSVP members of a meetup event and randomly chooses The Raffle Winner.' Below the repository name, there are tags for 'meetup', 'cpp', 'raffle', 'meetup-api', 'user-group', and 'usergroups'. At the bottom, the repository is categorized as 'C++', has 1 star, 1 fork, and is licensed under 'BSD-3-Clause', with a note that it was updated 25 days ago.
