CppCon 2019 Trip Report

...

Max Raskin

Venue: Gaylord Rockies Resort, Aurora, Colorado, Middle of Nowhere

Disclaimer

4 Recommended Talks

Algorithm Intuition

Speaker: Connor Hoekstra

Brief: A homage to Sean Parent's Rotate talk... :-) and sense of intuition when diving into STL - what to use when and overview of the new ranges algorithms.

Recommended: 👍

Applied WebAssembly: Compiling and Running C++ in Your Web Browser

Speaker: Ben Smith

Brief: Ben is working on WebAssembly in the Chrome team, in this talk he demos how to build clang for WASM and then compile from within your browser using that clang, pretty cool stuff.

Recommended: 👍

In-place Construction: the Routine Complexities of Efficiency

Speaker: Ben Deane

Brief: In-place construction in C++ isn't really obvious with STL, and with the advances of C++11 until C++20 there are some useful tidbits to know.

Recommended: 👍

Speed Is Found In The Minds of People

Speaker: Andrei Alexandrescu

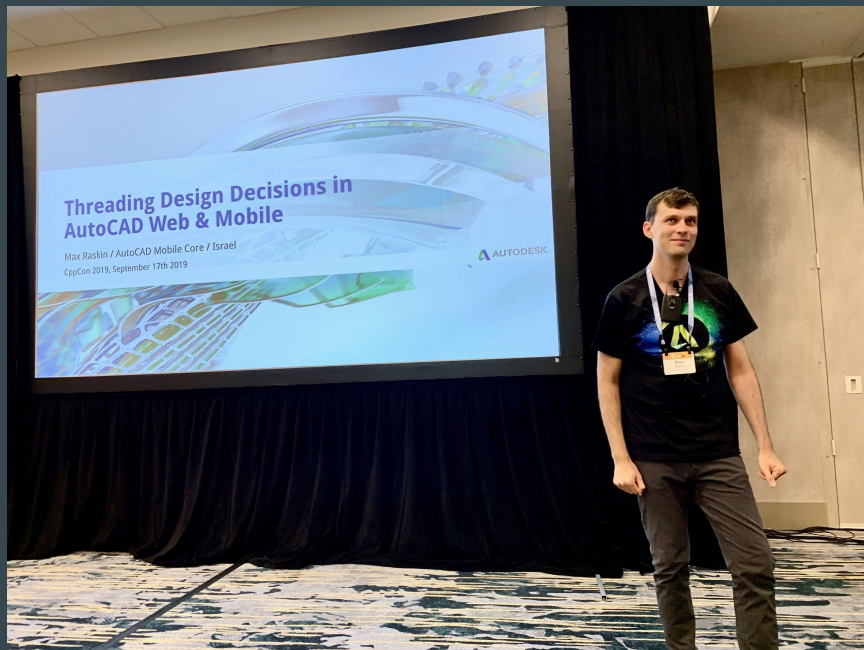

Brief: An Andrei show, a must-see! This time Andrei squeezes the juices of out an insertion sort.

Recommended: 🙌

Fun Facts

- ASAN is coming to VS2019 in 2nd week of November
- MS STL was released to GitHub, STL told me he'll be submitting code directly on GitHub and will be accepting PRs - possible code sharing with libc++ and libgnu c++.

Giving a talk is incredible!

See You At CppCon 2020!
